

I appreciate the technology provided by satellite radio. As a resident of Gurnee, Illinois, our area was recently hit with flooding. The Chicago radio stations have largely relegated traffic reports into 20-second unintelligible auctioneer-announcer style briefs. Satellite Radio was of wonderful benefit for commuting through the flooding zone.

PLEASE DO NOT LET THE NAB TAKE THIS AWAY FROM ME!! PLEASE REJECT THE NAB'S PETITION 04-160!!

I tune to my local media for the 'big story,' but as a matter of public safety and convenience, I really rely on my satellite radio's comprehensive traffic reports. I am willing to pay for this service regardless of who provides it - and it just so happens that satellite radio is doing a fine job.
